Helps reduce swelling and puffiness

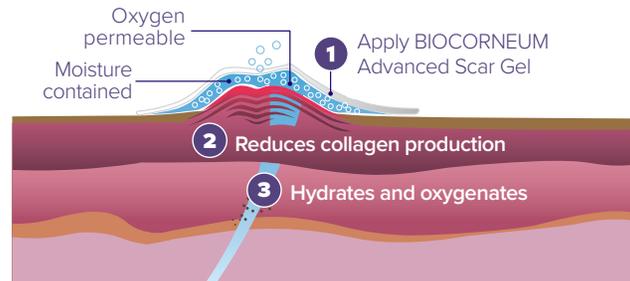

VITAMINS K1, K2, C & ZINC

Support collagen formation and skin strength

THE SCIENCE OF SCAR CARE

How Silicone Works: 3 Easy Steps

WHY SILICONE?

1. How Scars Form

Scars develop when the skin produces too much collagen during healing.

2. How Silicone Works

Silicone creates a balanced, hydrated environment that helps reduce excess collagen.

3. Why It Matters

Professional-grade silicone safely improves the scar's texture, color, and visibility.

PROVEN RESULTS

BEFORE

AFTER

Clinical results.

PROVEN SCAR CARE

Our patented silicone technologies are designed to visibly improve the appearance of scars, new and old. With a fast-drying, invisible finish, it's easy to wear daily and fits seamlessly into your routine.

BIOCORNEUM SILISILK™
Premium silicone, ideal for sensitive skin or evening use

BIOCORNEUM SILISHIELD®

Premium silicone, SPF30 UV protection

*For best results on new scars, apply 2x per day for 8-12 weeks.
